November 2 - December 7, 2011

Love and Logic

Becoming a Love and Logic Parent

Creating Happy Families and Responsible Kids

There's great news! Now Bethel is offering a Love and Logic class for parents and caregivers of children of all ages!

The primary mission of the Love and Logic Institute is to make the world a better place by helping parents raise great kids... kids who will grow up to be great citizens. The practical and proven tools will help you raise responsible, productive, respectful, and happy kids. Most importantly, parenting will be fun and rewarding, and you will be able to discipline your kids effectively without losing their love and respect.

The Becoming a Love and Logic Parent curriculum is based on their unique philosophy and approach, which unlocks the secrets of successful parenting. You will learn the specific "how-tos" of successful parenting, not just theoretical concepts. Imagine how you'll feel each week as you experience positive changes in your family! Topics covered include:

- Helicopters, Drill Sergeants and Consultants
- Four steps to Responsibility
- Love Me Enough to Set Some Limits
- Avoiding Power Struggles with Kids

The techniques are simple and easy to learn, and teach responsibility and character. They will positively change the lives of your family and lower stress levels of you and your kids.

The program includes a workbook and employs videos from parenting experts Jim and Dr. Charles Fay, who use the art of storytelling to demonstrate just how easy and effective these tools are.
